Gerflor Group
continually moving forward

To create, manufacture & market innovative, design-led & eco-responsible solutions for flooring, walls & their finishes.

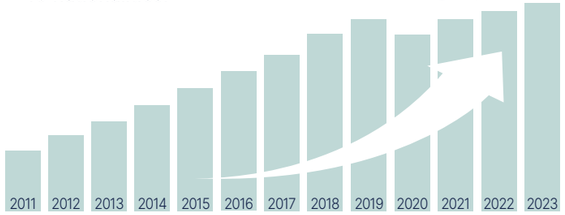
To anticipate the specific needs of the users, specifiers, installers & distributors around the world.

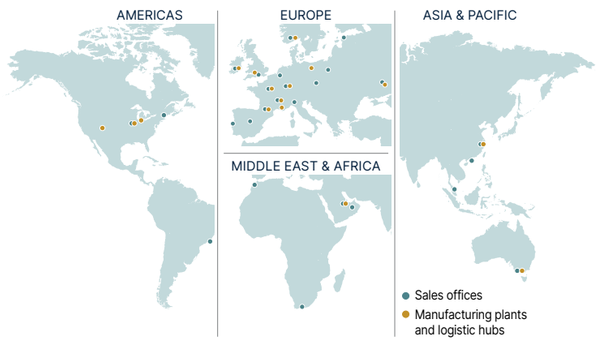
To provide competitiveness & success for all our customers.

International Presence
& Proximity To Our Customers Through:

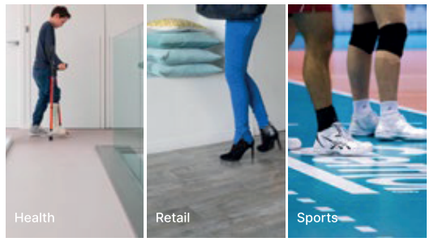
- ✓ 30 subsidiaries & a broad network of distributor partners.
- ✓ 19 production plants & logistic hubs.
- ✓ STAFF: 4 200 employees, 40 nationalities.

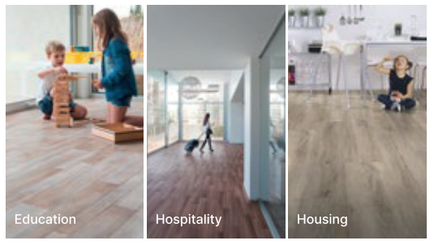
Sales growth
Gerflor group turnover





Industrial Expertise
in several fields





Design
trendy & creativity

- ✓ Our in-house Creation Studio brings product design originality & freshness.
- ✓ Our innovative ideas perfectly fit both market needs & creative expectations of interior designers, housing specifiers & architects.
- ✓ Our moto, be different
  70% of sales are achieved with product ranges less than three years old.

Decorator

- ✓ Every year, Gerflor renews its collections and reates new designs
- ✓ Designs solutions that can be combined and mixed to create custom spaces

Innovative Solution

GERFLOR SPIRIT

- ✓ 3 Research & Development centers dedicated to product innovation.
- ✓ 144 engineers for ultimate flooring solutions that anticipate the needs of our customers.
- ✓ Partnerships with laboratories and universities around the world enable Gerflor to benefit from the last materials & emerging technologies.

Innovation distinguishes between a leader and a follower.

Made in France with love

Designed and manufactured at our dedicated plants in Provence, our flooring is high quality and comes with the reassurance of genuine provenance. Each layer is carefully designed and manufactured to exacting standards using high quality materials to ensure that the finished product is both beautiful and extremely durable.

Gerflor Group
continually moving forward

Expert
quality & choice

- ✓ Extensive product range
- ✓ Top-quality products designed for high traffic
- ✓ Highly resistant
- ✓ Solutions for all customer needs:
  Installation type, size, all-uses, related accessories

Clever
quick & easy

- ✓ Make life easier
- ✓ Products installed without glue and without subfloor preparation
- ✓ Optimal user-friendliness
- ✓ Can be installed with a utility knife

Going Further

Raw materials

Healthy raw materials

- **No** heavy metals, **no** solvents, **no** formaldehyde
- **All materials are 100% compliant with European standards (REACH)**

Sustainable products
recycled content integration

- **Vinyl rolls GFT:**
  Patented GFT technology: backing with fibres made from recycled plastic bottles

Environmental footprint

- All our products are **eco-designed** based on a life-cycle analysis model in order to **reduce their environmental impact.**
- Our products are regularly assessed in accordance with **ISO 16000 standards.**

Indoor air quality

Low Voc Emissions

- All our products conform to **Floorscore, AgBB, A+ (France) and M1 (Finlande)** standards,
- TVOC emissions after 28 days **< 100 µg/m³,**
- Gerflor looselay solutions (GFT rolls, tiles and snap-together planks): no glue required.

VOC Free system

TVOC < 100 µg/m³ after 28 days

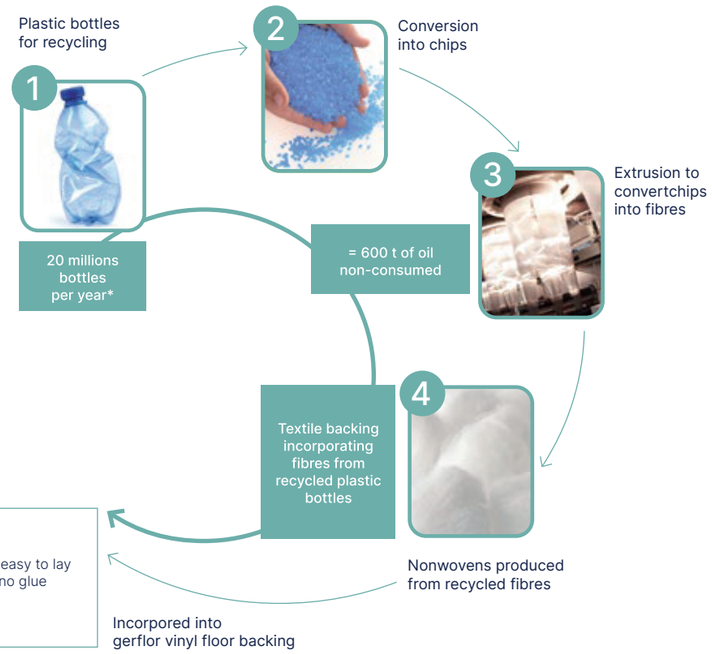
Recycling

Second Life is a Gerflor's innovative program for collecting installation waste and non-glued end-of-life products.
In partnership with our installers, this program is now fully effective in France and Germany and in the process of being implemented in Italy, Benelux and Scandinavia

Did you know?

Recycling process

Fibres used in gerflor products



* Quantities related to Gerflor annual production

WATER CONSUMPTION SINCE 1998

Did you know?
All inks used in the group's factories are solvent-free and water-based. The printing cylinders are cleaned with biodegradable agents and the wastewater inks are recycled by evaporation.

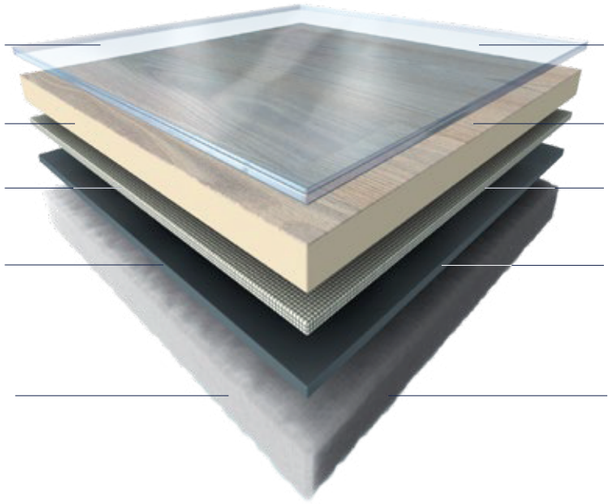
GFT GERFLOR FIBRE TECHNOLOGY®
RECYCLED FIBRES

Features



Benefits

Traffic resistance
Protection against scuff marks and scratches

Solvent free ink
Realistic printed design

Dimensional stability during temperature changes

Installs with no or with minimum subfloor preparation

Resistant to indentation
Acoustic comfort and sound reduction

Incredibly comfortable

Acoustics > Ideal for apartments and for covering hard floors that do not absorb noise

Warmer and flexible > comfortable to walk on

All uses

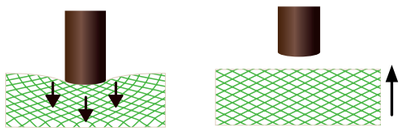
Watertight

Residential products: 2, 3 and 4 mm thick
Guaranteed 8-15 years

Highly resistant

Scratch-resistant varnish that protects and resists stains

Resistant fibres that protect against dents



Spring-like effect of fibres

INNOVATION ▶

texline nature

The first range of bio-attributed vinyl rolls

GFT GERFLOR FIBRE TECHNOLOGY® RECYCLED FIBRES

55%* natural, Bio-attributed or recycled

Laying without glue can be re-used

100% recyclable

Direct laying on ceramic
(if joints < 3mm wide and 1mm depth)

Resistant
Hight traffic rooms (living room, corridor...)

Thermal and acoustic insulation

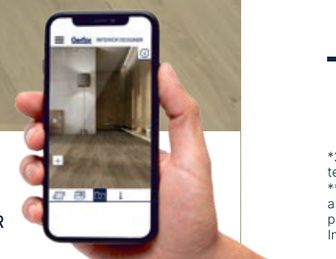
Waterproof
Ideal for wet rooms (bathroom, kitchen...)

Warranty
12 years for residential use

MADE IN FRANCE

*25% chalk, 12% salt, 10% biosourced PVC**, 8% recycled PET textilerecycled.
**Bio-attribution works like green electricity. It involves a quantity of raw material of biosourced origin, attributed to a finished product according to the principle of mass balance certified by the International Sustainability and Carbon Certification (ISCC).

Scan and discover INTERIOR DESIGNER



NEW

texline nature

55%
of natural, bio-attributed or recycled raw materials

- **25%** chalk
- **10%** PVC bio-attributed*
- **8%** recycled textile in recycled PET
- **12%** Salt

*Including 6% ISCC -certified bio-attributed ethylene, based on the mass balance principle, and 4% salt.
This helps to reduce the amount of fossil-based plastic, replacing it with bio-based materials.

GFT GERFLOR FIBRE TECHNOLOGY® RECYCLED FIBRES

Laying

Gerflor floor coverings are high quality products developed to last. No warranty can be claimed unless the product has been laid according to the following specifications:
The subfloor must be smooth, hard, dry and clean.
Unroll the floor covering 24 hours before it is due to be installed.
The floor covering should not be laid in rooms where the temperature is below 15°C.
Although Texline is resistant to subfloor moisture we recommend that the floor construction should contain a Damp Proof Membrane.
Can be installed on underfloor heating (up to 28°C).
Cold-weld the joints for perfect water-tightness.

Thanks to its special patented composition, Texline can be laid directly on most existing subfloors using loose laying.

Subfloor preparation:
On wooden floorboards and on ceramic tiles: Texline can be laid directly without any subfloor preparation. No levelling compound (finishing) needs to be applied even if there are open joints:
- up to 3 mm wide and a maximum depth of 1 mm in existing tiling,
- up to 3 mm wide in wood flooring.

On textile carpeting (felt or needle punch): Texline can be installed directly over the existing carpeting as it has excellent resistance to indentation.

On concrete: Texline can be installed loose-laid or semi-permanently without any special surface preparation. Use double-sided tape along the edges of the room.
A rough concrete surface should be treated with a smoothing compound beforehand.

Installation:
Loose laying: Laying without glue recommended below and up to 35 sqm. Use double sided tape or hook & loop strips around the edges and along the joints for a perfect and invisible fit.

Permanent laying: Laying with glue mandatory above 35 sqm. Use a single stick acrylic glue (approximately 250 g/sqm) and a finely notched trowel and cold weld the joints.

Cleaning & Care

Initial cleaning: Before commencing a regular maintenance programme, initial cleaning of the floor will be necessary to remove dirt accumulated during laying and other building works. Remove debris, sweep floor and vacuum to remove loose dirt. Wash floor with damp mop and using cold water and neutral detergent. Replace the water and solution if necessary. Remove stubborn marks with a non-abrasive pad.

Maintenance: Remove loose dirt with a broom or vacuum cleaner. Wash floor with damp mop and used cold water.

Cleaning: Frequency of periodic maintenance will depend on the amount of traffic and on the type of laying. Wash floor with damp mop using cold water and neutral detergent.

Discoloration: Discolouration can occur in any resilient floor covering if it comes into contact with pigment-containing substances such as bituminous materials, mastic, asphalt, oil, shoes with black rubber soles, or rubber rollers may cause discoloration.

See index page 143

EXCLUSIVE COLLECTION

THE DESIGN WAY

HIGH SEDUCTION HIGH TRAFFIC

GFT
GERFLOR FIBRE TECHNOLOGY®
RECYCLED FIBRES

Easy to lay
Product ready to lay, no preparation of the floor and no adhesive required: GFT takes up the unevenness of the existing floor.

Intensive/ High traffic
3.10 mm thick and 0.50 mm wearlayer hardwearing, suitable for domestic and semi commercial use.

Ultra comfortable
Acoustic and thermal insulation
Comfortable to walk on: its pliable fibres make it feel springy.

Easy-clean
Hygienic and antiallergenic.
Simply rinse with soapy water.

Totally watertight
Prevents moisture rising and mould.
Suitable for wet areas.

Warranty
15 years for residential use and 5 years for commercial use.

GFT GERFLOR FIBRE TECHNOLOGY® RECYCLED FIBRES

Laying

Gerflor floor coverings are high quality products developed to last. No warranty can be claimed unless the product has been laid according to the following specifications:
The subfloor must be smooth, hard, dry and clean.
Unroll the floor covering 24 hours before it is due to be installed.
The floor covering should not be laid in rooms where the temperature is below 15°C.
Although HQR is resistant to subfloor moisture we recommend that the floor construction should contain a Damp Proof Membrane.
Can be installed on underfloor heating (up to 28°C).
Cold-weld the joints for perfect water-tightness.

Thanks to its special patented composition, HQR can be laid directly on most existing subfloors using loose laying.

Subfloor preparation:
On wooden floorboards and on ceramic tiles: HQR can be laid directly without any subfloor preparation. No levelling compound (finishing) needs to be applied even if there are open joints:
- up to 5 mm wide and a maximum depth of 1 mm in existing tiling,
- up to 3 mm wide in wood flooring.

On textile carpeting (felt or needle punch): HQR can be installed directly over the existing carpeting as it has excellent resistance to indentation.

On concrete: HQR can be installed loose-laid or semi-permanently without any special surface preparation. Use double-sided tape along the edges of the room.
A rough concrete surface should be treated with a smoothing compound beforehand.

Installation:
Loose laying: Laying without glue recommended below and up to 35 sqm. Use double sided tape or hook & loop strips around the edges and along the joints for a perfect and invisible fit.

Permanent laying: Laying with glue mandatory above 35 sqm. Use a single stick acrylic glue (approximately 250 g/sqm) and a finely notched trowel and cold weld the joints.

Cleaning & Care

Initial cleaning: Before commencing a regular maintenance programme, initial cleaning of the floor will be necessary to remove dirt accumulated during laying and other building works. Remove debris, sweep floor and vacuum to remove loose dirt. Wash floor with damp mop and using cold water and neutral detergent. Replace the water and solution if necessary. Remove stubborn marks with a non-abrasive pad.

Maintenance: Remove loose dirt with a broom or vacuum cleaner. Wash floor with damp mop and used cold water.

Cleaning: Frequency of periodic maintenance will depend on the amount of traffic and on the type of laying. Wash floor with damp mop using cold water and neutral detergent.

Discoloration: Discolouration can occur in any resilient floor covering if it comes into contact with pigment-containing substances such as bituminous materials, mastic, asphalt, oil, shoes with black rubber soles, or rubber rollers may cause discoloration.

GFT GERFLOR FIBRE TECHNOLOGY® RECYCLED FIBRES

Laying

Gerflor floor coverings are high quality products developed to last. No warranty can be claimed unless the product has been laid according to the following specifications:
The subfloor must be smooth, hard, dry and clean.
Unroll the floor covering 24 hours before it is due to be installed.
The floor covering should not be laid in rooms where the temperature is below 15°C.
Although NEROK TEX is resistant to subfloor moisture we recommend that the floor construction should contain a Damp Proof Membrane.
Can be installed on underfloor heating (up to 28°C).
Cold-weld the joints for perfect water-tightness.

Thanks to its special patented composition, NEROK TEX can be laid directly on most existing subfloors using loose laying.

Subfloor preparation:
On wooden floorboards and on ceramic tiles: NEROK TEX can be laid directly without any subfloor preparation. No levelling compound (finishing) needs to be applied even if there are open joints:
- up to 5 mm wide and a maximum depth of 1 mm in existing tiling,
- up to 3 mm wide in wood flooring.

On textile carpeting (felt or needle punch): NEROK TEX can be installed directly over the existing carpeting as it has excellent resistance to indentation.

On concrete: NEROK TEX can be installed loose-laid or semi-permanently without any special surface preparation. Use double-sided tape along the edges of the room.
A rough concrete surface should be treated with a smoothing compound beforehand.

Installation:
Loose laying: Laying without glue recommended below and up to 35 sqm. Use double sided tape or hook & loop strips around the edges and along the joints for a perfect and invisible fit.

Permanent laying: Laying with glue mandatory above 35 sqm. Use a single stick acrylic glue (approximately 250 g/sqm) and a finely notched trowel and cold weld the joints.

Cleaning & Care

Initial cleaning: Before commencing a regular maintenance programme, initial cleaning of the floor will be necessary to remove dirt accumulated during laying and other building works. Remove debris, sweep floor and vacuum to remove loose dirt. Wash floor with damp mop and using cold water and neutral detergent. Replace the water and solution if necessary. Remove stubborn marks with a non-abrasive pad.

Maintenance: Remove loose dirt with a broom or vacuum cleaner. Wash floor with damp mop and used cold water.

Cleaning: Frequency of periodic maintenance will depend on the amount of traffic and on the type of laying. Wash floor with damp mop using cold water and neutral detergent.

Discoloration: Discolouration can occur in any resilient floor covering if it comes into contact with pigment-containing substances such as bituminous materials, mastic, asphalt, oil, shoes with black rubber soles, or rubber rollers may cause discoloration.

GFT GERFLOR FIBRE TECHNOLOGY® RECYCLED FIBRES

Laying

Gerflor floor coverings are high quality products developed to last. No warranty can be claimed unless the product has been laid according to the following specifications:
The subfloor must be smooth, hard, dry and clean.
Unroll the floor covering 24 hours before it is due to be installed.
The floor covering should not be laid in rooms where the temperature is below 15°C.
Although Texline is resistant to subfloor moisture we recommend that the floor construction should contain a Damp Proof Membrane.
Can be installed on underfloor heating (up to 28°C).
Cold-weld the joints for perfect water-tightness.

Thanks to its special patented composition, Texline can be laid directly on most existing subfloors using loose laying.

Subfloor preparation:
On wooden floorboards and on ceramic tiles: Texline can be laid directly without any subfloor preparation. No levelling compound (finishing) needs to be applied even if there are open joints:
- up to 5 mm wide and a maximum depth of 1 mm in existing tiling,
- up to 3 mm wide in wood flooring.

On textile carpeting (felt or needle punch): Texline can be installed directly over the existing carpeting as it has excellent resistance to indentation.

On concrete: Texline can be installed loose-laid or semi-permanently without any special surface preparation. Use double-sided tape along the edges of the room.
A rough concrete surface should be treated with a smoothing compound beforehand.

Installation:
Loose laying: Laying without glue recommended below and up to 35 sqm. Use double sided tape or hook & loop strips around the edges and along the joints for a perfect and invisible fit.

Permanent laying: Laying with glue mandatory above 35 sqm. Use a single stick acrylic glue (approximately 250 g/sqm) and a finely notched trowel and cold weld the joints.

Cleaning & Care

Initial cleaning: Before commencing a regular maintenance programme, initial cleaning of the floor will be necessary to remove dirt accumulated during laying and other building works. Remove debris, sweep floor and vacuum to remove loose dirt. Wash floor with damp mop and using cold water and neutral detergent. Replace the water and solution if necessary. Remove stubborn marks with a non-abrasive pad.

Maintenance: Remove loose dirt with a broom or vacuum cleaner. Wash floor with damp mop and used cold water.

See index page 143

Cleaning: Frequency of periodic maintenance will depend on the amount of traffic and on the type of laying. Wash floor with damp mop using cold water and neutral detergent.

Discoloration: Discolouration can occur in any resilient floor covering if it comes into contact with pigment-containing substances such as bituminous materials, mastic, asphalt, oil, shoes with black rubber soles, or rubber rollers may cause discoloration.

Laying

The subfloor must be smooth, clean, dry, undamaged and flat.
Recommendations:
Unroll the floorcovering 24 hours before laying.
Floor covering should not be laid in rooms at a temperature below 15°C.
Can be installed on underfloor heating (up to 28°C).
Weld the joints (cold-treatment product) to ensure good water-tightness.

Recommended laying methods:
- Loose laying without glue: up to 35 sqm.
- Laying without glue, with double-sided tape or hook & loop strips around the edges of the room: over 35 sqm.
- Laying without preparation if joint < 3 mm wide and depth < 1 mm.

If permanent laying with glue: use a single stick acrylic glue (approximately 250 g/sqm).
Use a finely-notched trowel.

Cleaning & Care

Initial cleaning: Before commencing a regular maintenance programme, initial cleaning of the floor will be necessary to remove dirt accumulated during laying and other building works. Remove debris, sweep floor and vacuum to remove loose dirt. Wash floor with damp mop and using cold water and neutral detergent. Replace the water and solution if necessary. Remove stubborn marks with a non-abrasive pad.

Maintenance: Remove loose dirt with a broom or vacuum cleaner. Wash floor with damp mop and used cold water.

Cleaning: Frequency of periodic maintenance will depend on the amount of traffic and on the type of laying. Wash floor with damp mop using cold water and neutral detergent.

Discoloration: Discolouration can occur in any resilient floor covering if it comes into contact with pigment-containing substances such as bituminous materials, mastic, asphalt, oil, shoes with black rubber soles, or rubber rollers may cause discoloration.

Laying

The subfloor must be smooth, clean, dry, undamaged and flat.
Recommendations: unroll the floorcovering 24 hours before laying.
Floor covering should not be laid in rooms at a temperature is below 15°C.
Can be installed on underfloor heating (up to 28°C).
Weld the joints (cold-treatment product) to ensure good water-tightness.

Recommended laying methods:
- Loose laying without glue: up to 25 sqm.
- Laying without glue, with double-sided tape or hook & loop strips around the edges of the room: over 25 sqm.

If permanent laying with glue: use a single stick acrylic glue (approximately 250 g/sqm).
Use a finely-notched trowel.

Cleaning & Care

Regular cleaning with a vacuum cleaner, dust mop or a wet cloth.

Cleaning: with water and a neutral detergent; rinse with clean water.

Stain removal: White Spirit removes almost all stains.
Do not use solvents.

Precautions: do not use floor wax.
Avoid rubber leg caps and casters. Replace with plastic caps and polyamide casters.
Protect the bases and legs of your waxed furniture with a felt disc.

Laying

The subfloor must be smooth, clean, dry, undamaged and flat.

Recommendations: unroll the floorcovering 24 hours before laying.
The floor covering should not be laid in a room if the temperature is below 15°C.
Laying on underfloor heating is possible (up to 28°C).
Weld the joints (cold-treatment product) to ensure good water-tightness.

If permanent laying with glue: use a single stick acrylic adhesive (approximately 250 g/sqm).
Use a finely-notched trowel.

Cleaning & Care

Regular cleaning with a vacuum cleaner, dust mop or a wet cloth.

Cleaning: with water and a neutral detergent, rinse with clean water.

Stain removal: White Spirit removes almost all stains.
Do not use solvents.

Precautions: do not use floor wax.
Avoid rubber leg caps and casters.
Replace with plastic caps and polyamide casters.
Protect the bases and legs of your waxed furniture with a felt disc.

See index page 143

Laying

The subfloor must be smooth, clean, dry, undamaged and flat.

Recommendations: unroll the floorcovering 24 hours before laying.
The floor covering should not be laid in a room if the temperature is below 15°C.
Laying on underfloor heating is possible (up to 28°C).
Weld the joints (cold-treatment product) to ensure good water-tightness.

Cleaning & Care

Regular cleaning with a vacuum cleaner, dust mop or a wet cloth.

Cleaning: with water and a neutral detergent, rinse with clean water.

Stain removal: White Spirit removes almost all stains.
Do not use solvents.

Precautions: do not use floor wax.
Avoid rubber leg caps and casters.
Replace with plastic caps and polyamide casters.
Protect the bases and legs of your waxed furniture with a felt disc.

Laying

The subfloor must be smooth, clean, dry, undamaged and flat.

Recommendations: unroll the floorcovering 24 hours before laying.
The floor covering should not be laid in a room if the temperature is below 15°C.
Laying on underfloor heating is possible (up to 28°C).
Weld the joints (cold-treatment product) to ensure good water-tightness.

If permanent laying with glue: use a single stick acrylic adhesive (approximately 250 g/sqm).
Use a finely-notched trowel.

Cleaning & Care

Regular cleaning with a vacuum cleaner, dust mop or a wet cloth.

Cleaning: with water and a neutral detergent, rinse with clean water.

Stain removal: White Spirit removes almost all stains.
Do not use solvents.

Precautions: do not use floor wax.
Avoid rubber leg caps and casters.
Replace with plastic caps and polyamide casters.
Protect the bases and legs of your waxed furniture with a felt disc.

Laying

Laying recommendations: Gerflor floorcoverings are high quality products developed for a long life.

Any warranty claim will only be considered if the product has been laid according tothe following specifications:

- The subfloor must be smooth, hard, dry and clean.
- Unroll the floorcovering 24 hours before it is due to be installed.
  - During laying, the room temperature may not be below 18°C, and the ground temperature below 15°C.

Permanent installation/full stick:
- Use a single stick acrylic glue (approx. 250 g/sqm).
- Use a finely notched trowel and cold weld the joints.

Cleaning & Care

Initial cleaning: Before commencing a regular maintenance programme, an initial cleaning of the floor will be necessary to remove dirt accumulated during installation and other building works. Remove debris, sweep floor and vacuum to remove loose dirt.
Wash floor with damp mop and bucket containing cold water and neutral detergent. Replace the water and solution if necessary.
Remove stubborn marks with a non-abrasive pad.

Maintenance: Remove loose dirt with a broom or vacuum cleaner. Wash floor with damp mop and bucket with cold water.

Cleaning: Frequency of periodic maintenance will depend on the level of traffic and on the nature of the installation.
Wash floor with damp mop and bucket containing cold water and neutral detergent.

Discoloration: All resilient floor covering can discolour due to the transference of colouring substances.
Contact with bituminous materials, mastic, asphalt, oil, shoes with black rubber soles, or rubber rollers may cause discoloration.

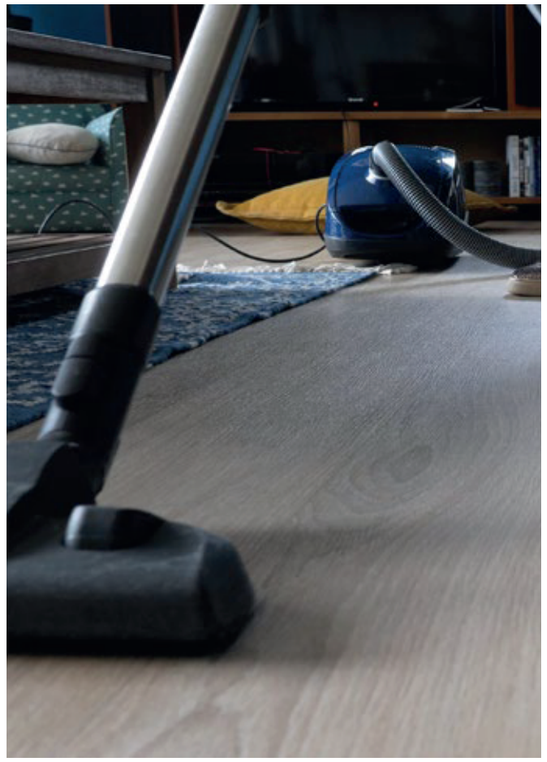
How to care
For your Gerflor floor

Safety tips

- Use plastic coasters or felt pads under the feet of furniture and other heavy objects
- Protect from sources of heat and spills.



Cleaning

Regular cleaning: use a vacuum and a damp mop with a standard, no-rinse detergent solution.
Gerflor recommends using its Power Cleaner for routine cleaning.

Deep cleaning (every 6-12 months):
to make your floor shine like new again, use a restorative product.
Gerflor recommends using its Renovator Polish to protect and enhance the look of your floor.
It leaves a matte finish and brightens up colours.

Stubborn stains: use diluted bleach, white spirit, alcohol or lemon juice.

- stains such as tomato sauce, mustard, beet juice, blood, ink and iodine: use diluted bleach, allowing it to sit for several minutes and then rinsing thoroughly.
- rust stains: clean with fabric rust remover and rinse thoroughly.
- marker, pen, grease and glue stains: rub gently with a cloth moistened with white spirit, and rinse thoroughly

Products to avoid: acetone, chlorinated solvents such as trichlorethylene, wax, glaze.

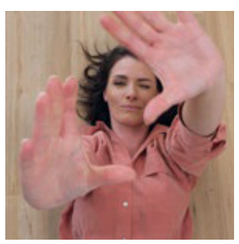
Communication
Tools

A useful set of sales tools, available to help your sales teams present and promote Gerflor products in-store for more:

- Impact upon end consumers
- Information on products' benefits
- Decoration strength
- Laying advice on videos

Interior Designer

Simulate your renovation project with Gerflor



Thanks to our real-time simulation tools, you can integrate our floors directly into your photo and choose the ideal color. Let your creativity speak and visualize the result before even starting the renovation work.
