

St Paul, August 19^h 2020

Dear sir,

At your request, I inform you of our actions within the framework of the implementation of **REACH (Regulation, Evaluation, Authorization of Chemicals)**.

1) GERFLOR only uses raw materials which are not included in REACH candidate list. So all the GERFLOR products are 100% REACH compliant. In fact we confirm not to introduce into our floor coverings substances of very high concern (SVHC), such as cancerigen-mutagen-reprotoxic 1A&1B (CMR 1A & 1B), or persistent-bioaccumulative-toxic (PBT), or very persistent-very bioaccumulative (vPvB). You can find the candidate list of substances subject to authorization (SHVC) included today in the REACH candidate list, in the following link
http://echa.europa.eu/chem_data/candidate_list_table_en.asp

2) Particularly we can confirm our products do not contain substances which are included in Reach candidate list

Of course, according to the regulation, if we will introduce substances including in the candidate list at a level > 0,1% weight, we shall inform our customers.

3) Moreover our floorings don't contain heavy metals (lead, cadmium, tin ...), formaldehyde, flame retardant pentachlorophenol, latex and solvent

We remain at your disposal for any additional information you may need.

Best regards

Philippe MAGRO
Technical product manager
