

Sport Court® PowerGame+™ is an outdoor polypropylene square tile which dimensions are 30.5 cm x 30.5 cm existing in 10 different colours. It is designed with a double grid structure and a second grid layer to have a saddle shape. With 6 locks per tile, the assembly is easy and secured. The weight of the assembled tiles is at least 3460 g/m². The court will have a thickness of 1.9 cm. Such thickness and product structure provides the following characteristics allowing to reach the EN14877 standard outdoor sports requirements:

- Surface dry friction (EN13036) between 95 and 105
- Surface wet friction is minimum 55
- Shock absorption (EN14808) is at least 11% without underlay
- Ball bounce (EN12235) with a minimum of 100%.
- Lock strength at least 1312 N which shows the robustness of the courts.
- Colour change (EN ISO 20105-A02) at least 4

Moreover, POWERGAME+ is approved by several international federations: FIVB, IHF, FIBA, FIBA 3x3, ITF Class 4 and IFF.

Concerning sustainability, it is made in France with a 100% recyclable polypropylene, warranted 15 years and 100% REACH compliant. 100% of the production waste are recycled. It is a modular solution with 0 installation waste.
