

CLEAN CORNER SYSTEM

gerflor.com

AN INNOVATIVE CORNER SYSTEM

Controlling contamination in technical facilities and clean rooms is always a challenge. Corners, in particular, are where most of the imperfections are found:

- Their shape makes cleaning and decontamination difficult
- Poorly welded, they can tear or sag under the weight of traffic
- Weakened by use, they end up losing their watertightness

In partnership with cleaning professionals, Gerflor has developed **Clean Corner System**: a patent pending innovative corner solution. Years of research and development have led to **Clean Corner System** (this system works only with Gerflor floors).

Thanks to ultra-resistant and versatile profiles (photo 1), the **Clean Corner System** is suitable for all your projects, for perfect results (photo 2).
