* TILES :

- For tiles stated as installed at 90°, it is also possible to put them in the same direction if requested by the project management or client.

 In this case, this type of installation eliminates the effects of surface gloss [matt/shine], but will make the joints more visible.
- \bullet Treatment of joints: hot welds are necessary for tiles when they are of a format above 50 x 50cm.

For any products not appearing in the list, please contact our technical service.
