

Gerflor®

HEALTHCARE

Solutions for Every Healthcare Space

Integrated Solutions for Health and Wellness

Safety and hygiene are more critical than ever in healthcare environments. With unparalleled expertise, Gerflor offers specialized guidance in choosing the best solutions. From operating rooms and emergency services to patient rooms, clinics, outpatient facilities, back-of-house areas and lobbies, Gerflor enhances patient well-being with designs that support safety, movement, and easy maintenance.

No-downtime Installation Options

Flooring installation methods eliminate downtime, and can allow for installation over existing or challenging subfloors.

Complete Solutions for Every Facility

Products designed to withstand the rigorous demands of high-traffic areas and heavy wear in all healthcare facilities.

The majority of Gerflor solutions are manufactured in company-owned facilities, including all heterogeneous and homogeneous flooring, linoleum and technical tiles.

Evidence-based Design Focus

The goal with all our solutions is to recognize measurable outcomes that meet the highest-priority requirements of your system in a sustainable way.

Focus on Well-Being

Relevant visuals contribute to biophilic environments. Gerflor offers the unique ability to digitally print artwork onto wall panels, providing a calming and positive distraction within an integrated system. VOC product emissions are up to 100 times lower than the standards.

Gerflor has over 3 million square feet of flooring installed in the single-largest hospital project in North America.

Top-Rated for Safety and Hygiene

Gerflor's flooring is ideal for high-traffic areas where slip resistance, durability, hygiene, and easy maintenance are essential.

Failing seams in resilient flooring can cause:

- Safety hazards
- Infection-control risks
- Costly downtime

Gerflor's seam integrity stands out, with superior performance in "Newtons of Force" testing under ISO 16906 and EN 684.

Advanced Cleaning for Environmental Services (EVS) Infection Control

Seamlessly integrated wall and floor systems streamline maintenance and disinfection, reducing costs and complexity.

Our patented surface treatment technology means **no wax for life** while delivering outstanding stain and chemical resistance—enhancing EVS efficiency and improving infection control.

Clean Corner System

Our patented Clean Corner System eliminates trapped dirt and debris in corners. A complete solution for installing corners that aids in the control of contamination and provides advanced cleaning capabilities, exceeding all healthcare requirements.

Enhanced maintenance efficiency

- 1 Rounded external angle
- 2 Rounded internal angle

Gerflor Healthcare Solutions

Homogeneous Flooring

Since 1937, we have been pioneers in homogeneous flooring, specially designed for the most demanding healthcare environments. It features unmatched durability and a seamless design that facilitates compliance with rigorous infection control standards.

Heterogeneous Flooring

Combining functional performance with aesthetic versatility, heterogeneous flooring is ideal for areas requiring both durability and design flexibility.

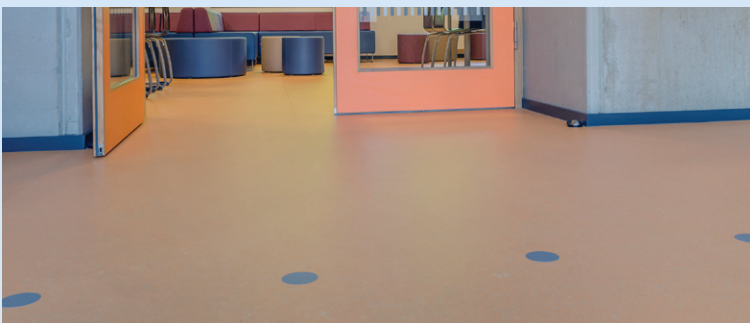

LVT

Widely used in healthcare, our LVT offers biophilic visuals, minimal VOC emissions for better health and wellness, and a durable wearlayer for high-traffic areas. With a great selection and easy-to-maintain PUR+ surface, it's the ideal choice for any space.

Technical Tiles

Our heavy-duty technical tile solutions are perfect for back-of-house and extreme high-traffic areas. Easily installed over existing or challenging subfloors. The modular design creates seamless, monolithic visuals while meeting higher ISO Cleanliness standards than typical healthcare flooring.

PVC-Free

Sustainability and health are key in today's design choices. We offer PVC-free options in homogeneous flooring, and linoleum—eco-friendly solutions for high-traffic commercial spaces that support sustainability goals and improve indoor air quality.

Wall Coverings

Seamlessly joins with flooring to provide an integrated system guaranteeing impeccable hygiene and effortless maintenance. Wall coverings can be welded to floors for a continuous floor-to-wall infection-control environment.
