## Why upgrade your flooring?

- Fibre backing adds warmth and insulation to your floors
- Cushioned for comfort under your feet
- Durable flooring that resists wear and indentations
- Easy to clean and maintain for the entire life of the product
- Fully waterproof so those spills will not affect your new floor
- Transform your new house into a home with realistic designs
- 20 years on the market, tried and tested solution

GFT is a patented backing system from Gerflor, made from more than 95% recycled plastic bottles. It has many benefits including more warmth and comfort underfoot, sound deadening qualities and it can be laid over most existing floors by evening out small imperfections in the sub-floor - Unroll... it's done!

## Features and Benefits

- 1 Wearlayer and protective varnish - pureclean GripX finish
  - 2 Realistic embossed design layer
  - 3 Fibreglass interlayer
  - 4 Exclusive compact stability layer
  - 5 Innovative GFT backing
- A Toughness, durability, stain resistance
  - B Print quality, realism, diversity
  - C Product Strength
  - D Even flooring despite unevenness of the floor
  - E Acoustic comfort and can be loose laid
