PLEASE NOTE:

- These adhesives have been tested by their respective manufacturers as compatible with Gerflor flooring products and typical installation conditions. However, Gerflor does not warrant the performance of the listed adhesives, nor does it guarantee that the information provided is complete or up to date. Gerflor disclaims any responsibility for failures arising from the use of these adhesive products in conjunction with its flooring systems.
- Adhesives should be applied in strict accordance with the manufacturer's guidelines.
- Using an unsuitable or non-recommended adhesive may invalidate the product warranty. It is also important to keep records of the adhesive used as evidence of compliance with the specified requirements.

* High-risk areas are those exposed to substantial temperature variations, high humidity, or direct heat and sunlight, while wet areas refer to spaces susceptible to surface moisture, including splash zones and areas with continuous water exposure such as showers and ensuite.
