POWERGAME+

Designed for playing multi sport activities

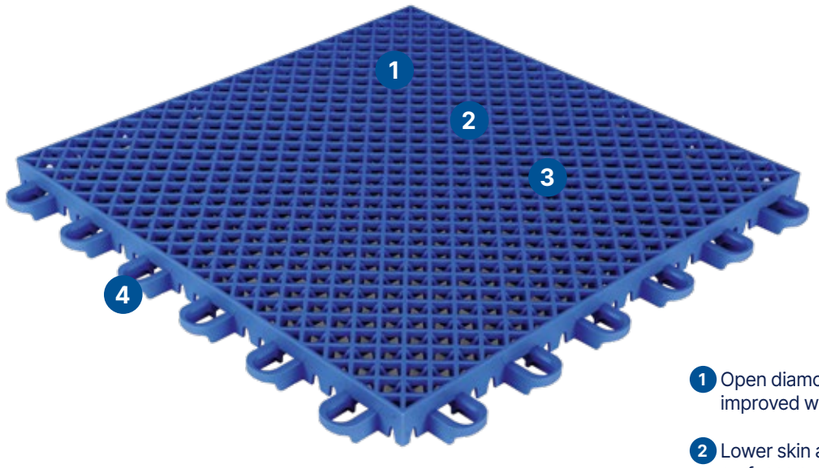

Versatile by design, PowerGame+ is suitable for both permanent installations in schools and public spaces and temporary solutions for events, tournaments and community activities.

They have numerous applications, either in permanent configurations for daily use in schools and public spaces, or in temporary configurations for events.

PowerGame+

The next step in multi-sports outdoor surfacing

1. Open diamond-shaped grid design for improved water drainage.
2. Lower skin abrasion than traditional court surfaces such as concrete and asphalt.
3. UV stabilisers and a patented formula keep your outdoor court playable, even at temperatures of up to 85°C.
4. Triple-Action locks and double-walled loops ensure maximum stability and keep the system securely in place.
5. Patented shock-absorbing grid understructure.
6. Patented second-layer saddle design for superior water drainage.
7. Patented Lateral Forgiveness™ technology helps reduce joint strain and fatigue.

Polypropylene profiles

Easy and fast installation

Edge male
30.5 x 9.5 x 1.9 cm

Edge female
30.5 x 9.5 x 1.9 cm

Corner edge
9.5 x 9.5 x 1.9 cm

Composition: tile, edge, corner = 100% Polypropylene

PowerGame+'s unmatched safety and playability make it the perfect court for competition & leisure. Specially engineered to optimize shock absorption. Reduce risk of impact injury. Provide the best combination of abrasion protection and dry traction.

UV protection
Outstanding colour durability.

Extreme durability
Wide and deep connection loops.

High stability and durability over installation and removal, safety of the players.

Optimal playability
Optimal grid design.

Double-grid structure for faster drying, reduced water rebound, and optimal safety.

Top-grid
"Open diamond" design for a better drainage.

Lower grid
"Saddle" shape to prevent water retention.

Made in France
Fast delivery, reducing carbon footprint.

Recyclable through Gerflor Second Life program

Tensile strength		N		1312
Change of colour	EN ISO 20105-A02	-	≥ 3	≥ 3

Play with complete confidence

Compared to asphalt playing surfaces, PowerGame+ is the ideal solution

Hard playing surfaces place significant strain on the joints, increasing the risk of injury.
Our PowerGame+ surface offers optimal playing comfort and ensures the safety of players of all levels.
The stability of the tiles ensures optimal ball bounce performance.
Rapid water drainage optimises playing comfort after rain.

Excellent energy return

Reduces muscle strain by
10%

Better cushioning whilst running

Improves performance by
10%

Higher running speed

Reduces all movements impacts by
20%

Better prevention of stress fractures and musculoskeletal injuries

Reduces stress on the shinbone

« Our study has shown that the **Sport Court® PowerGame+™** surface reduces impact and muscle fatigue during play compared to a concrete surface. We observed a significant reduction in the level of muscle activation for the same level of performance, as well as a reduction in low-frequency muscle vibrations, which correspond to the resonance frequencies of human tissue. **As such, Sport Court® outdoor tiles will significantly reduce mechanical stress and thus lower the risk of injury among players.** »

Christophe HAUTIER,
Director of the Research Unit at the Interuniversity Laboratory of Biology and Motor Function in Lyon, France.

PowerGame+ provides a unique balance between safety, comfort and durability

- High tile stability optimises ball rebound and game performance
- Improved water drainage enables faster drying and playability after rain
- Low skin abrasion protects players when falling without compromising on traction

« I chose Sport Court® PowerGame™+ tiles for my court in Cameroon. It's a surface on which I feel safe. It provides excellent footing and better shock absorption than concrete or asphalt, which brings greater comfort during play. The surface is very stable, and the ball bounce is comparable to that of any other basketball court. »

Joakim NOAH,
Former French-American professional basketball player

Long-lasting aesthetics

Design a court that makes an impression. With a selection of 10 fade-resistant tile colours, you have more ways to customise the look of your playing surfaces to fit your requirements, whether you want a fun colourful court, or to customise it with your company's or school's colours.

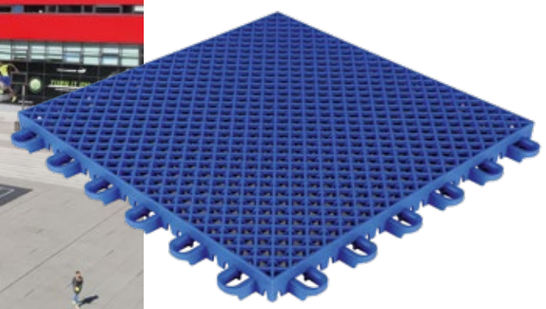

Choose your colours

Steel Blue | Dark Blue | Bright Blue | Candy Pink | Green | Black

Gray | Kiwi | Orange Pop | Terracotta | Granite | Bright Red

Powergame+ tile are composed by colored polypropylene without compromise on the colors, giving excellent resistance against the UV for more than 15 years!

Customise your court by easily adding logos

Time and money saving

Quick and cost-effective refurbishments

Old asphalt courts turned new and beautiful again in just a day!

Make the most of your existing facilities. Sport Court's patented, interlocking tiles easily overlay outdated concrete, asphalt and acrylic surfaces. Now, you can repurpose underutilised courts and free up space for more sports and recreational programming.

Sport Court tiles come in a wide range of vibrant colours, allowing you to design eye-catching surfaces that enhance your recreation areas. What's more, Sport Court surfaces are guaranteed to keep their good looks for years to come with minimal maintenance.

Easy installation and maintenance

The simple and strong interlocking system enables the installation of a 1,000 sqm court in 4h

A court of 1000sqm = 4 Court installation hours + 2 Game line painting hours

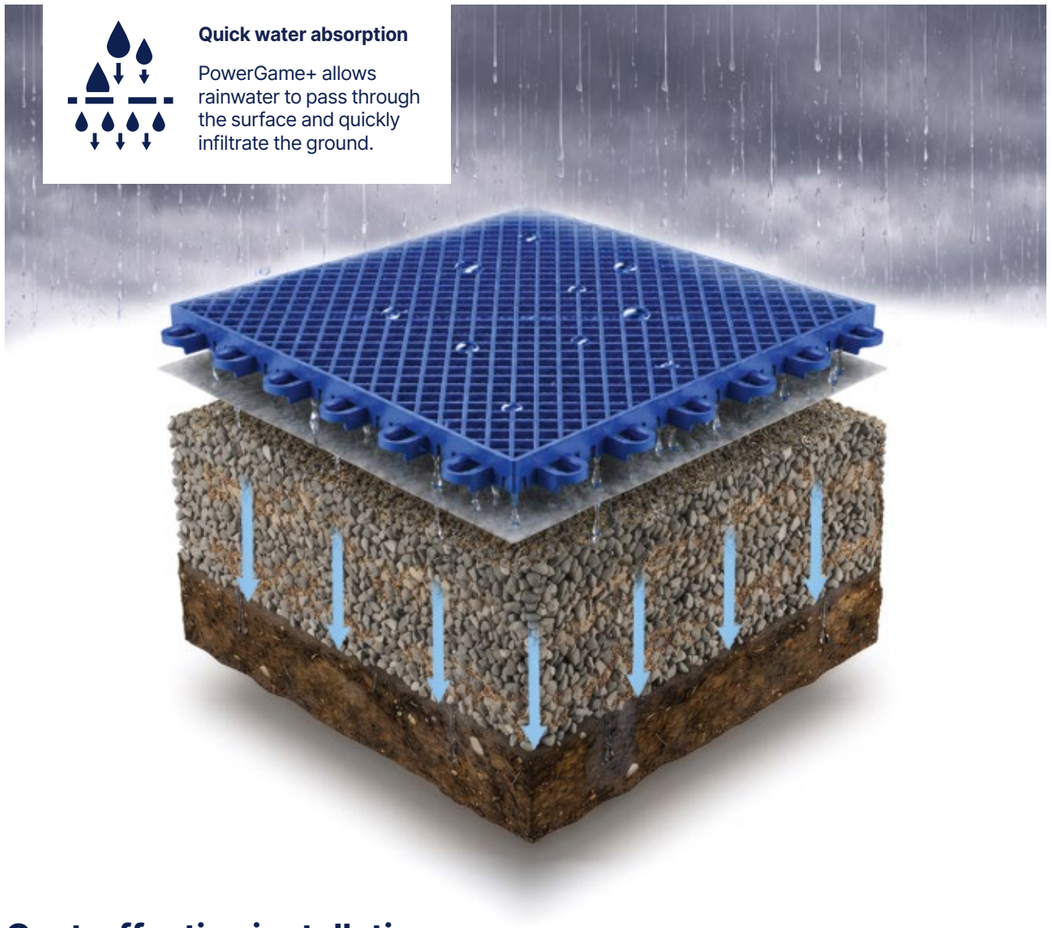

With a packaging of 40 tiles, in ranges of 8 **pre-assembled tiles**, the installation is easy and fast. The installation of finishing solutions and the painting of game lines will perfect the court transformation. Disassembly is as easy and quick as assembly.

PowerGame+ has high durability with no yearly or costly refinishing. No sanding or resurfacing is required, unlike synthetic grass and other hard court surfaces.
All the dirt will be drained out of the tiles thanks to the rain!
Our local technical team will be your partner at every step to provide a responsive support.

Crushed gravel installation

A solution to growing flood risks

- More impermeable surfaces mean more runoff and more flooding.
- Natural land is disappearing at an alarming rate.
- Permeable installations help water infiltrate the ground naturally.
- Supporting sustainable drainage is key to building more resilient communities.

Quick water absorption

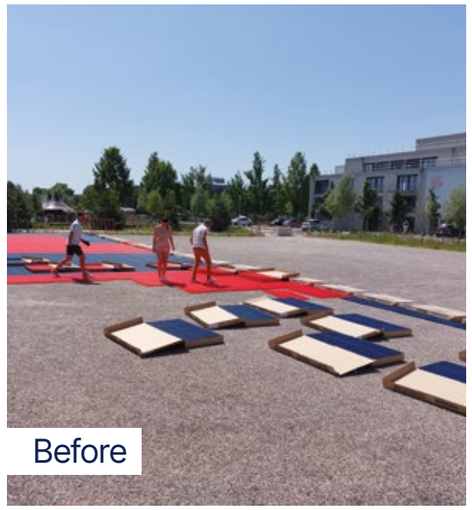

PowerGame+ allows rainwater to pass through the surface and quickly infiltrate the ground.

Cost-effective installation

- Install directly on crushed gravel, no expensive asphalt or concrete base required.
- Lower installation costs and faster project delivery.
- Maintains natural soil permeability while providing a durable play surface.
- Provides a great enhancement to the urban landscape.
- The ideal solution for sustainable and affordable playground and sports area projects.

"OASIS"

The "OASIS" concept

An oasis courtyard is a school space that has been redesigned to create cooler areas within urban environments.

These courtyards, often planted with vegetation, are designed to reduce the urban heat island effect and provide pleasant outdoor environments for children. Oasis courtyards incorporate natural surfaces, green spaces and play areas, promoting sustainable rainwater management, biodiversity and social interaction.

GREENING
& COOLING

RAINWATER
INFILTRATION

A wide range of benefits for children's health and well-being

Encouraging physical activity
Oasis playgrounds encourage children to move, play and stay active, supporting healthy development and overall well-being.

A safer environment
Thoughtfully designed outdoor spaces help create safer and more comfortable areas for everyday play and learning.

Improved thermal comfort
Vegetation, permeable surfaces and shaded areas help reduce heat build-up and create cooler outdoor environments.

Connecting with nature
Daily interaction with natural elements fosters environmental awareness and encourages sustainable behaviours.

Enhanced quality of life
Greener and more attractive schoolyards create enjoyable spaces where children can learn, play and thrive.

Transforming schoolyards into green, multifunctional spaces delivers lasting benefits for children while contributing to a more sustainable future.

Water absorption
The permeable design of PowerGame+ tiles allows rainwater to pass through and quickly infiltrate the ground.

Reduced heat absorption
Unlike asphalt, PowerGame+ tiles are designed to reduce heat build-up. Thanks to their innovative structure and lower thermal mass, they absorb less heat, cool down more quickly, and release less stored heat into the surrounding environment.

The result is cooler, more comfortable outdoor spaces for children, even on hot summer days.

No dust!
The 19mm height offers protection from dust or the ground itself; shoes and clothing stay clean which matters to parents.

Natural colours
A wide range of colours enables seamless integration into oasis landscape designs. Bespoke colours can also be developed on request.

Coloured tiles
A range of accent-coloured tiles helps clearly define play areas and create attractive, harmoniously integrated playgrounds.

Prevent injuries
Unlike concrete, PowerGame+ provides 11% shock absorption, helping to reduce impacts and lower the risk of injuries.

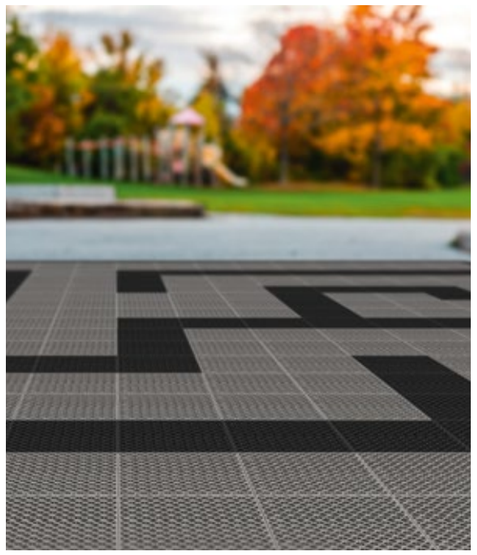

Noise reduction
Compared with concrete, PowerGame+ tiles help reduce impact noise by 5% to 10%, particularly during basketball rebounds.

SportGame™ PB Pickleball tiles

Specially engineered for safety and performance in pickleball.

Our **pickleball tiles** are the perfect solution to play a fun game and to practice at the top levels.

Thanks to the grip they offer, playing safe is our priority. Easy to install, economic solution to develop pickleball in your area.

1. SportGame™ PB surface provides lower skin abrasion compared to traditional hard court surfaces like acrylic and concrete.
2. The UV stabilizers and patented formula keeps your outdoor court playable, even at surface temperatures up to 73°C.
3. Patented Lateral Forgiveness™ to reduce your joint strain and fatigue.

A high-performance surface

Optimal safety

Surface designed to reduce joint fatigue and the risk of slipping.

UV protection

Better colour retention that does not store heat and ensures user well-being.

Durability

Ensure long-lasting high performance, with a warranty of 15 years.

Optimised ball bounce

Courts can be used immediately

Quick to install, the court is ready for use as soon as the last tile is clipped into place.

Low maintenance and economical

A playing surface that's always available for your favourite sport.

100% Recyclable through Gerflor Second Life program

Gerflor®

More details: 1. Scopes 1, 2 & 3, in absolute value, market-based. Trajectory approved by SBTi (Science Based Targets Initiative). 2. Proportion of raw materials used in floors and walls that do not contribute to resource depletion: bio-based, mineral and recycled materials. Includes salt used in the synthesis of PVC. 3. Average proportion of recycled material in Gerflor's flooring and wall coverings. 4. Volume of scraps processed at our recycling plant. 5. Proportion of turnover generated by looselay floor coverings that are easy to remove and/or reuse. 6. Proportion of floor and wall products with a TVOC concentration of less than 100 µg/m³ over a 28 days period. 7. Proportion of flooring and wall covering sales in Europe covered by FDES or EPDs. 8. Proportion of women in the workforce and among managers. 9. Proportion of positions filled through internal mobility. 10. Number of work-related accident, including temporary workers. Target on accident frequency rate (number of work-related accident per millions hour worked) <3.
